

Reports of Compliance

A report of compliance must be obtained from the District before the municipal construction official can issue a Certificate of Occupancy. Inspection requests require 5 days notice.

Types of Compliance

Conditional: A conditional report is issued for the temporary stabilization of staggered occupancy projects or during the non-growing season. Compliance with all other requirements of the certified Soil Erosion and Sediment Control Plan is also required.

Complete: A final report is issued when permanent stabilization is established on the entire project. The project is final graded, top-soiled, limed, fertilized, seeded, mulched, and tacked and all permanent features of the erosion control plan have been installed.

1+ Acre Projects: A NJPDES permit (#NJG0088323) for Stormwater Discharge Associated with Construction Activity is required for projects 1 acre or more. A Request for Authorization (RFA) form must be submitted electronically online through NJDEP at <http://www.nj.gov/dep/stormwater/>.
